

Withering Attacks

1. Strike Roll:

[Dex+(Ability)+(Weapon Accuracy)+(Mods)] vs Target's Defence (Parry/Evasion)

Parry [Dex+(Brawl, Martial Arts, or Melee)+1 w/speciality]/2 (round up) + weapon's Defence Bonus

Evasion [Dex+(Dodge)+1 w/speciality]/2 (round up). - Mobility Penalty

2. Find Raw Damage:

[Strength+(Weapon Damage)+(Threshold Successes)]

3. Roll Damage Pool: [Raw Damage-(Target's Total Soak)], check vs Weapon's Min Damage. Roll the higher of the 2 dice pools

4. Reduce target's Initiative by damage rolled & increase your own by same +1.

If target has been reduced to 0 or less by this attack, add +5i crash bonus.

Decisive Attacks

1. Strike Roll: Roll

[Dex+(Ability)+(Mods)] vs The target's chosen Defence (Parry or Evasion).

If your attack fails and is <11: -2i.
If your attack fails and is >10: -3i.

2. If Successful: Check your Initiative vs the target's Hardness.

If your Initiative is greater, roll it as a pool. (NOTE double tens rule does not apply).

3. Apply the number of successes vs target's Health Track as appropriate type of damage.

4. Reset to Base Initiative (3).

Grapples

Grapple (Dif 2): Grappler & target make **opposed (Strength + [Brawl or Martial Arts])** roll. If tied or target wins, target escapes the grapple next turn. If attacker wins, gains control of the grapple for rounds equal to threshold successes. Grapple ends if grappler is Crashed. Each time the grappler suffers an attack and/or damage, lose 1 turn of control. Grappler & target at -2 Defence. No flurries. Target can't take movement actions, suffers -1 penalty to all attacks, -3 penalty to attacks using 2-handed weapons. Every Round the Grappler may do 1 of the following:

Savage: If withering, roll unarmed attack vs Defence 0 for additional damage. Hits automatically. If decisive, no attack roll necessary—roll Initiative & apply damage.

Restrain/Drag: Costs 2 rounds of control, can't be used if victim wins control roll. Attacker immobilises victim. Inflicts no damage, but victim can't act for a turn. If grappler moves while restraining, target goes with her.

Throw/Slam: Grapple ends, inflicting boosted savaging damage (+2 withering/turn forfeited, +1 decisive/turn forfeited). Opponent left prone. Can only use up to (Strength) turns of control.

Release: Reflexive action.

Combat Actions

Aim: +3 bonus at Close/Short range. Required for Medium or longer ranges, no bonus unless used twice. Can't be flurried.

Clash Attack: Opposed attack rolls. Character with more successes wins. Withering Clash, add the threshold succ's to raw damage & +3 Initiative after damage. Decisive Clash +1 automatic point of Health Track damage after damage rolled. -2 penalty to loser's Defence until next turn.

Countermagic: Int+Occ within short range of the target caster. When SMs reduced to 0, the spell shatters. Target sorcerer can't shape next round.

• If known: 1 success = 1 sm.

• If unknown: 2 successes = 1 sm.

• Countermagic cannot be Flurried

Defend Other Parry vs incoming attack roll.

Successful attack chosen to hit protector or charge. If Decisive, & chooses charge, damage pool reduced by ½ Defender's Defence +1.

Delayed Action: -2 Init.

Disengage: (Dex + Dodge) vs (Dex + Ath) of opponents stopping the disengage. Costs 2 initiative.

Distortion: Within short range of a cast spell effect. **Extended Int+Occ** roll with Circle-based difficulty (1, 3, or 5 respectively). Terminus of 5. See spell description for effects.

Draw/Read Weapon: Used to **change weapons**. -1 Defence until next action.

Characters begin combat with a weapon of their choice drawn/readied, unless ambushed (p. 203). Natural weapons always ready.

Full Defence : Until next turn, **Defence rises by 2, -1 initiative**. Can't be flurried with anything but social influence, nor used during Crash.

Join Battle (Reflexive): Starting Initiative is [Wits+Awareness+3, can't be botched.

Miscellaneous: Defence reduced by 1 until his next turn.

Move: Move 1 range band toward a location.

Rise From Prone : Usually automatic, but if an opponent is at close range roll (Dex + Dodge, diff 2) to succeed.

Rush: Target an opponent in short range, may be used after a move action. **Contested (Dex+Ath)** roll between character & opponent at short range. If successful, as soon as opponent moves a range band, immediately move one range band toward that opponent. Does not count as a movement action.

General Gambits

Gambits are **made after a decisive attack** roll. Roll **initiative vs gambit's difficulty**.

If the Gambit fails you lose initiative equal to the Gambit's difficulty+1. You cannot attempt a Gambit that could Crash you.

Disarm (Dif 3): Knock an opponent's weapon away to short range. Retrieving a disarmed weapon requires moving to the weapon's location and using a draw/ready weapon action.

Unhorse (Dif 4): Knock an opponent off his mount. An unhorsed character suffers one level of bashing damage and is rendered prone. Mount usually flees.

Distract (Dif 3-5): Attacker declares a non-Crashed ally as beneficiary; they gain Initiative the character loses from this gambit. Transferred Initiative must be used to attack the gambit's target on the ally's next turn, or it is lost. Can only benefit from one distraction bonus at a time.

Stealth

Opposed Dex+Stealth vs Per+Awar.

Context penalties can apply to either roll.

Characters in Stealth can't Rush, and must roll **Dex+Stealth** to remain hidden while moving.

Unexpected attacks can only be made from stealth.

Unexpected Attacks

Ambush: Attack vs a target completely unaware of the attacker's presence. The target is considered to have Defence 0 against the attack.

Surprised: an attack launched from hiding against an opponent who is actively on the lookout for attacks, even if he isn't sure exactly where all of his opponents are at the moment. A target faced with a surprise attack suffers a -2 Defence penalty against that attack.

Investigation

- **Case Scene (15 min): Per+Inv** vs general difficulty to investigate the scene or Conceal Evidence action previously used at this scene.

- **Profile (5 min): Per+Inv vs Target's Guile.** Success gives a basic run down of the character.

Larceny

- **Conceal Evidence (15 min): Int+Larc,** successes = difficulty to Investigate the scene.

Disguise (5 min): Int+Larc, successes = difficulty to recognize target with Per+Awar. -2 to disguise rolls to change sex, race or body type, each. -4 to trick anyone that has an intimacy for the character you are disguised as.

- **Lockpicking (5 min):** Roll **Dex+Larc** difficulty = to Lock (Mundane 1-2, Magical 3, First Age 4+)

- **Pick Pocket (Instant):** Roll **Dex+Larc** opposed by Per+Awar.

Survival

Tracking/Counter Tracking: Tracker rolls **Perc+Surv** (+/- Environmental modifiers) vs Counter-Tracker's **Wits+Surv** roll.

Weapon Tags

1H: A ranged weapon that can be used in one hand.

2H: Uses both hands. +2 to Clash attacks.

Archery: Uses the Archery ability. Also lists the max range. Archery weapons require 2H unless they have 1H Tag.

Balanced: +1 Overwhelming.

Bashing: Inflicts Bashing Damage.

Brawl: Uses the Brawl ability.

Chopping: Costs 1 Defence & 1 Initiative, +3 withering damage, reduce Target's Hardness by 2.

Concealable: Can be concealed by dif 1 Larceny roll.

Crossbow: Add +4 for withering damage, not Strength.

Cutting: Weapon has a bladed edge that can cut thin objects.

Disarming: -1 difficulty & cost of Disarming gambits.

Flame: Add +4 to withering damage, not Strength bonus. Accuracy is +0.

Flexible: Weapon ignores target's Full Defence action bonus.

Improvised: Usable with Melee or Brawl, -1 Initiative/attack.

Grappling: Can be used to make grappling gambits.

Lethal: Inflicts lethal damage.

Martial Arts: Requires a Martial Arts ability that uses it.

Melee: Uses the Melee Ability.

Mounted: Can be used from mounted position.

Natural: Part of the users body, cannot be disarmed.

Piercing: Costs 1 Defence & Initiative, -4 to target's soak.

Poisonable: Designed to be used with Poison. Pg 232.

Powerful: At close range it inflicts damage as per Heavy.

Reach: Negate the bonuses of mounted opponents.

Shield: Full Defence action becomes able to be part of a flurry, but not with an attack. Shield weapons have -2 damage.

Slow: This weapon takes a combat action to reload.

Smashing: -1 Defence & -2 Initiative, to knock back your target 1 range band or prone.

Special: An unusual property.

Subtle: Weapon inflicts 0 damage. Can still poison.

Thrown: Uses the Thrown ability. Also lists the max range.

Worn: Can be removed but counts as natural when worn.

Common Willpower Point Expenditures

- **Add 1 Success** to a single roll.

- **Increase a Static Value (Defence, Guile or Resolve)** for a single use of that value.

- Reject certain kinds of social influence.

Regaining Willpower Points

- **A good night's rest** restores 1 WP.

- **1 WP once/scene** when undergoing hardship/sacrifice for a Major/Defining Intimacy

- **1-3 WP upon achieving a major character or story goal.**

- **1 WP for Level 2 stunt s.**

- **2 WP for Level 3 stunts.**

- Reset when Limit Break ends.

- Reset at the beginning of each story.

Essence

Regaining Motes

- **In Combat:** 5 Motes at the end of each round.

- **Out of Combat:** 5 Motes per hour.

Delta Banner

Each 5 Peripheral Motes spent at once raises a level

Dim: Anima is invisible.

Glowing: Anima outlining character & Caste Mark appears. Stealth/Disguise at -3.

Burning: Character blazes with light, stealth impossible

Iconic/Bonfire: Grand display of power featuring your personal Icon. Stealth impossible.

Lore

- **Introducing a Fact:** Lore 3+ Rolls **Int+Lore** vs a ST difficulty based on how likely the character would know it.

- **Challenging a Fact :** Character with **Lore 3+ or Lore 1+ with a speciality.** Roll **Int+Lore** vs a ST difficulty. Character know something is false but not necessarily what or why.

Social Combat

Influence Roll: [(Social Attribute)+(Social Ability)+(Mods)] vs Resolve or Guile

Resolve vs Instill, Inspire, Persuade, Bargain, & Threaten actions.

Resolve =
[(Wits+Integ+Specialty)/2 round up]+Intimacy Mod

Guile vs Read Intentions action.

Guile = [(Mani+Soc+Specialty)/2 round up]

What you can do with Social Combat:

- Discover the Intimacies of Others
- Protecting your own Intimacies from discovery.
- Exploiting others' Intimacies after discovery to:
 - Instilling others with new Intimacies.
 - Strengthening or Weakening an Intimacy they hold.

If character's Appearance is higher than target's Resolve, he gains a dice bonus on all instil and persuasion attempts against that individual equal to the difference.

Social Complications

One Vs Many: -3 penalty.

Determine important targets within a crowd individually, assume an average Resolve for crowd in general.

Written Social Actions: Ability for written social action is linguistics. Appearance has no effect.

Gestures & Body Language Alone: adds +2 to target's Resolve.

Overturning Influence: +3 Resolve to resist a new attack to make him abandon that course of action after first influence successful.

Social Actions in Combat: Limited to 3 seconds or requires multiple actions. **May flurry Social Actions** with normal Combat Actions.

Social Combat Actions

Instil: Used to change the feelings & beliefs of others. Player declares what he wants to make target feel or believe. ST may apply penalties to the roll if this is particularly implausible or hard to accept, to max -5. On success, target forms an Intimacy towards that belief. **Retry:** New argument/Intimacy or new story.

Inspire: Used to incite emotions and passions in others, usually with **Performance**. Choose emotion to incite. On success, target is impassioned according to the emotion evoked—but player chooses what form that passion takes. **Retry:** Wait until the current scene has ended to Inspire same Intimacy.

Persuade: Convince other characters to do an action or task. Without supporting Intimacy, can only convince others to do relatively trivial & risk-free actions. **Retry:** New argument/Intimacy or new story.

Minor – Inconvenient Tasks: Persuade to do longer-than-scene task, if amount of time needed does not disrupt their life & is no great risk to themselves or those they care for.

Major – Serious Tasks: Persuade to perform tasks that carry the risk of extreme harm or impediment, not certain death or total ruin. Can take extended amounts of time.

Defining – Life Changing Tasks: Persuade to do almost anything. Only certain death or total ruin will make them pause.

Bargain: Offer a bribe, gift, or favour that the target believes is worth the difficulty or danger of the task you're asking him to perform. **Retry:** Bigger Offer.

Threaten: Convince people to do things without having to appeal to their Intimacies, but something they don't want. It can be used as an instil action to give the target a Tie of fear, or intensifies such an Intimacy.

Read Intentions: Allows a character to discern what another character wants to achieve in a scene of interaction, or what their intimacies are. **(Perception+Socialize) vs target's**

Guile. Retry: Current target cannot be retried until after the current scene is over.

Can be used in order to determine what Intimacies a character has. Before rolling, player should describe what kind of Intimacy he wants to know. **If target observed unaware, -2 to Guile.**

Resisting Influence

Willpower: If influence is trying to create, destroy or change his Intimacies, may spend 1 WP to:

- Stop a new Intimacy from being created.
- Stop a Major or Defining Intimacy from being weakened.
- Reject a successful inspire action

Decision Points: Character fails to resist influence to make him act. Player must choose an Intimacy and explain how it justifies resistance. Chosen Intimacy must be same/higher than Intimacy which supported the influence roll, can't be the one that strengthened his Resolve previously. Character may then spend 1 WP to resist

Lengthy Debates: If a new angle on an old issue is raised after a character brought to a Decision Point, must find another intimacy to resist again. Can be the intimacy used in the original Decision Point, but if so is not then available for a new Decision Point.

Unacceptable Influence: A character targeted by unacceptable influence may reject it without spending WP, even if his Resolve would not normally be high enough to defend against it. Unacceptable influence includes:

- Instil/Persuade actions which don't exploit an appropriately strong intimacy.
- Bargain attempt which fails to offer a properly enticing incentive or threaten action which is insufficiently threatening.
- Influence that would cause a character to kill himself, or do something he knows would result in certain death.
- Influence that would cause a character to abandon or end a Defining Intimacy.
- Seduction attempt that violates a character's sexual orientation.

Environmental Hazards & Traps

Hazards have a Damage Value (# & type), Time Interval, & Difficulty. **All hazards are decisive attacks that ignore hardness and soak.**

Resisting Dice Pools, rolled every Interval:

Heat/cold, Dehydration, Fatigue, Poisons: Stamina+Resistance

Falling Boulders, dart traps, etc: Dexterity+Dodge

Finding shelter, making a fire, etc: Wits+Survival

Stopping a crushing ceiling, catching a falling stone, etc: Strength+Athletics

Treat traps as Hazards, except for: Chance to Notice: Per+Awareness, variable difficulty, and no interval.

Environmental Hazard	Damage	Interval	Diff
Acid Bath	3L	Round	5
Severe Heat/Cold	1B	Hour	1
Bonfire	4L	Round	5
Lava	6L	Round	5
Sandstorm	1L	Minute	3
Elemental Storm	2L	Minute	3
The Silent Wind	4Ag	Round	4

Falling

Ignores soak & hardness, does both automatic levels and dice of damage.

Fall Range	Levels of Damage	Dice of Damage
Short	3B	5B
Medium	4L	7B
Long	5-7L	8-12L
Extreme	7-10L	10-14L

Deprivation

Suffocation: A character will die after Stamina minutes without Air. If the character is exerting himself or didn't have a good breath to begin with will perish after Stamina x2 ROUNDS.

Starvation: A character will suffer a -3 to all actions after Stamina days without food, and die after Stamina Weeks without food.

Dehydration: A character will die from dehydration after Stamina days without water.

Diseases

Once exposed, roll **Sta+Res vs Virulence**.

Sta+Res vs Morbidity for disease to get better/worse.

Interval: Duration of time between morbidity rolls.

Symptoms: Failing morbidity rolls moves up the symptoms stages. Not all diseases have Defining Symptoms or Death as possible stages. The general stages are as follows:

Minor : Lose 1 Willpower.

Major : Serious symptoms. ST can inflict **1 auto-botch a session** based on symptoms.

Defining: The disease defines the character's lifestyle. ST may inflict **1 auto-botch per scene** based on the symptoms.

Death: Exalted ignore death from non-magical diseases.

List of diseases on pp.234-236

Poison

Resisting : Roll **Sta+Res** to reduce duration. Exalted & supernatural beings can reduce a duration to zero. Mortals and animals can reduce it by half (rounded up).

Vector: How the poison must be administered. If Wound, Poison can only be inflicted in battle by a decisive attack.

Damage: Number of Dice and type of damage inflicted. Poisons ignore Soak and Hardness.

Penalties: Penalties affect all actions taken by the victim.

Doses: Multiple doses of venom stack durations only.

Combat Poisons: Poisons that have intervals of rounds that will be effective in combat should have Initiative Damage not health levels damage.

Poison	Damage	Interval	Duration	Penalty	Vector
Arrow Frog Venom	3i	Round	5 Rounds	-2	Wound/Ingestion
Arsenic	2L	Day	7 Days	0	Ingestion
Curare	1i	Round	10 Rounds	-2	Wound
Hemlock	2L	Hour	5 Hours	-4	Ingestion
Snake Venom	2i	Round	3 Rounds	-3	Wound
Dream Wisp	1B	5 minutes	1 Hour	-3	Ingestion
Wood Spider Venom	3i	Round	2 Rounds	-3	Wound
Yozi Venom	1L	Minute	10 Minutes	-5	Wound
